📍 Mombasa, Kenya

🔗 LinkedIn: Available upon request

PROFESSIONAL SUMMARY

Dedicated Computer Science and Mathematics student with a strong foundation in analytical thinking, research methodology, and technical problem-solving. Demonstrated expertise in academic writing, AI system evaluation, and cross-disciplinary research. Proven ability to work independently in remote settings while maintaining high standards of accuracy and ethical consideration. Seeking opportunities to contribute to innovative AI projects and research initiatives that prioritize data quality and ethical development practices.

EDUCATION

Bachelor of Science in Computer Science & Mathematics

Technical University of Mombasa

Expected Graduation: 2026

Comprehensive program covering advanced mathematics, computer science theory, and practical programming applications. Focus areas include discrete mathematics, algorithms, data structures, and computational theory.

Bachelor of Science in Computer Science

University of the People (Online)

Ongoing

Accredited online degree program emphasizing software development, database management, and computer systems. Complementing technical education with flexible, self-directed learning.

TECHNICAL SKILLS

Programming Languages

- Python (Advanced)
- Java (Intermediate)
- Object-Oriented Programming
- Algorithm Design

Development Tools

- Jupyter Notebooks
- PyQt Framework
- MoviePy, OpenCV
- Linux (Kali) Environment

AI & Machine Learning

PROFESSIONAL EXPERIENCE

Freelance Academic & Technical Writer

2023 – Present

- Authored comprehensive academic papers and research reports across psychology, mathematics, and computer science disciplines
- Implemented rigorous editing and proofreading processes to ensure clarity, factual accuracy, and adherence to academic standards
- Developed critical analysis skills through source evaluation and information synthesis for coherent argument construction
- Maintained consistent quality while working independently in remote settings with minimal supervision

Academic Research & Programming Projects

2022 – Present

- Designed and implemented Python and Java applications demonstrating object-oriented programming principles and software engineering best practices
- Developed complex algorithms and efficient data structures for academic computing projects
- Conducted applied mathematics research with emphasis on precision, analytical rigor, and methodological soundness
- Collaborated on interdisciplinary projects integrating computer science with psychological research methodologies

CORE COMPETENCIES

Analytical & Research

- Complex Problem Deconstruction
- Fact-checking & Accuracy Validation
- Research Methodology & Design
- Critical Analysis & Synthesis
- Data Quality Assessment

Professional Skills

- Remote Work & Self-Management

- AI Platform Proficiency
- Prompt Engineering & Design
- Model Evaluation Techniques
- Ethical AI Implementation

- Academic & Technical Writing
- Deadline-oriented Project Delivery
- Clear Technical Communication
- Ethical Research Practices

RESEARCH & ACADEMIC PROJECTS

Interdisciplinary Psychology-Computer Science Research

Collaborative project examining the intersection of cognitive psychology and computing systems. Developed research methodologies and analytical frameworks for cross-disciplinary study.

Applied Mathematics Problem-Solving

Conducted research in discrete mathematics and number theory, developing novel approaches to complex mathematical problems with computational applications.

AI System Evaluation Framework

Developed methodologies for assessing AI system performance, focusing on accuracy metrics, ethical considerations, and output quality evaluation.

PROFESSIONAL DEVELOPMENT

- **IBM SkillsBuild** - AI and Data Science Foundations
- **DataCamp** - Python Programming and Data Analysis
- **Self-Directed Learning** - Ethical AI Practices and Prompt Engineering
- **Academic Research** - Methodology and Technical Writing

ACADEMIC ACHIEVEMENTS

- ★ Consistently high academic performance in advanced mathematics courses including discrete mathematics and number theory
- ★ Recognition for excellence in computer science coursework and programming projects
- ★ Selection for prestigious collaborative research projects combining multiple academic disciplines
- ★ Demonstrated proficiency in both theoretical concepts and practical applications across mathematics and computing

RESEARCH INTERESTS

- Artificial Intelligence Ethics and Development
- Data Quality and Validation Methodologies
- Human-Computer Interaction and Cognitive Psychology
- Algorithmic Problem-Solving and Optimization
- Interdisciplinary Research Methodologies

LANGUAGES

English: Fluent (Professional Proficiency)
Reading, Writing, Speaking

Swahili: Native Speaker
Full Professional Proficiency

AVAILABILITY

Available for research collaborations, freelance academic writing projects, and AI development initiatives. Particularly interested in opportunities involving ethical AI development, data quality assessment, and interdisciplinary research projects. Flexible for remote work arrangements.
